

grand jury's investigation, and how did the information that a committee of the grand jury took testimony from Carl Waldron in the Monadnock building, leak out?

There has been far too much talk about the difficulty of getting evidence sufficient for the return of true bills.

There is no difficulty in getting evidence of malfeasance in office against Mayor Harrison and Chief of Police McWeeny.

If the grand jurors take that trip down the line, they will see the resorts running wide open, flaunting their shame in the face of the whole world.

That is against the law both of Chicago and of the State of Illinois. The police are permitting these resorts to run thus openly. They are guilty of conniving at the breaking of the law.

And it must not be forgotten that no minor police official is daring to do anything like that without the permission and approval of the administration.

### —o—o—o— CALLS GIANTS UNFAIR

Horace Fogel, president of the Philadelphia National League team, in signed statement, accuses the New York Giants of having won the pennant by "fixing" umpires. He says that there were at least 21 games that the Giants won that they should have lost had the umpiring been on the square.

Fogel also predicted that President Lynch would not remain long at the head of the National League.
